1 INTRODUCTION

This user manual provides a comprehensive description of all features and functionalities for the **Building and Containment Information Collection System (BCICS)** app, which is a part of Integrated Municipality Management System (IMIS).

Authorized users of the app can follow the instructions provided in this manual to easily perform their desired tasks.

1.1 Purpose of App

The **Building and Containment Information Collection System (BCICS)** app is required to collect and upload new or missing footprints of buildings and containment locations of a selected municipality.

The collected data will be processed and utilized in the Integrated Municipal Information System (IMIS)

1.2 Target User

Target User of the BCICS-IMIS app are:

- IT personnel/GIS Specialist/Supervisor of municipality.
- Outsourced Agency Staff.

2 APP INSTALLATION

An APK file will be provided in a predefined location such as <http://website.com/mobile> that can be downloaded and installed in your smartphone.

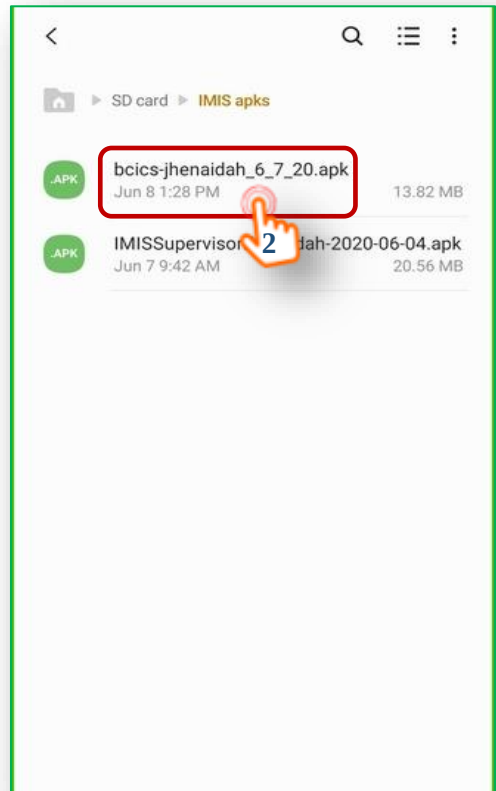

2.1 Prerequisite of Installation

The smartphone to have ‘Android’ as the operating system and minimum version has to be 5.0.

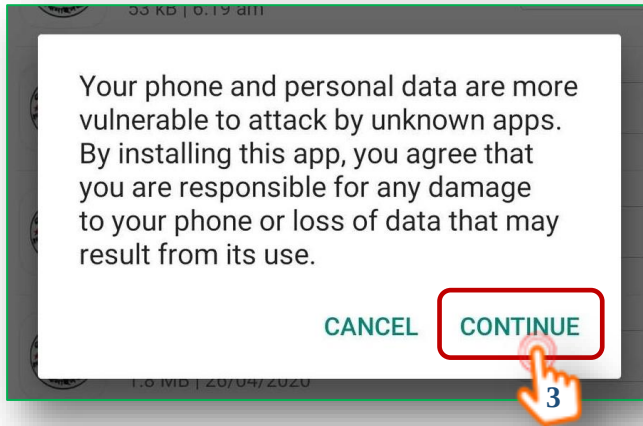

2.2 Steps to Install

Step 1: Download the *APK* file in your smartphone and go to ‘Download’ folder using the ‘File Manager’.

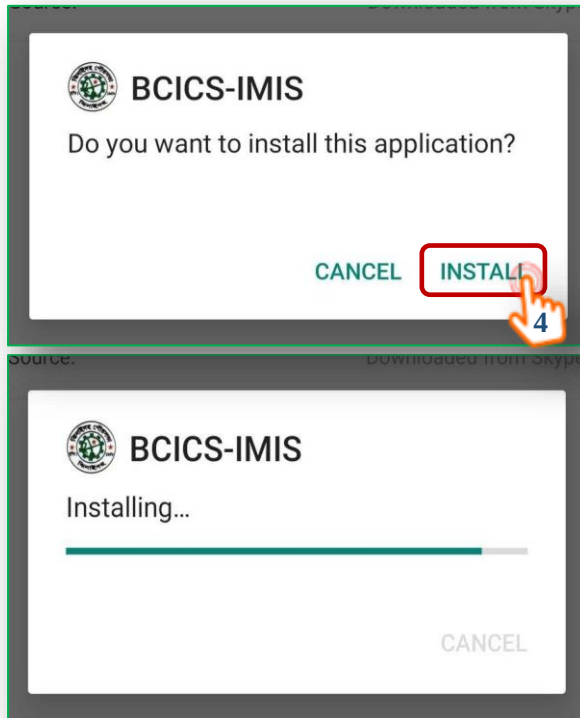

Step 2: Locate the corresponding *.apk* file and tap on it. Installation process will begin.

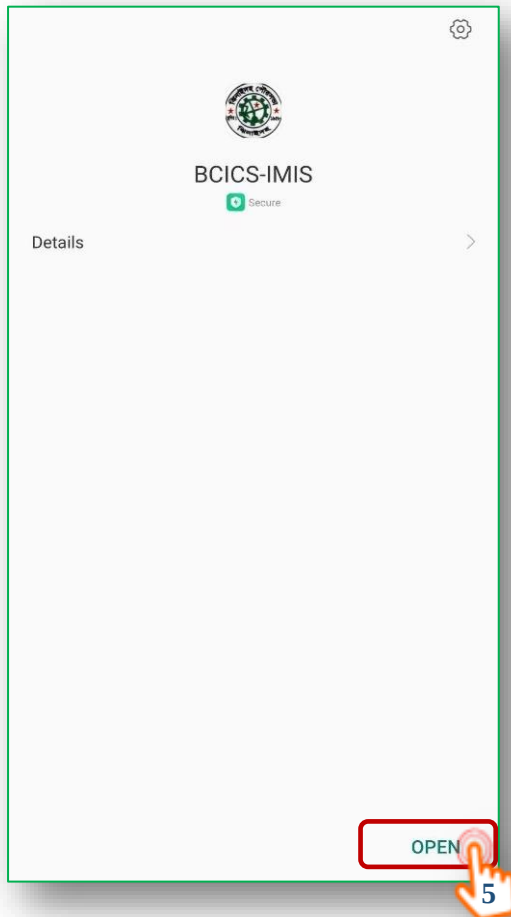

Step 3: Tap on ‘Continue’ button if system asks permission to install app from unknown source.

Step 4: Tap on ‘Install’ button. An “Installing...” progress bar will be displayed.

Step 5: Tap on ‘Open’ button after installation process is completed.

The app will load and Login Screen will appear.

**Building and Containment
Information Collection System
(BCICS) - IMIS**

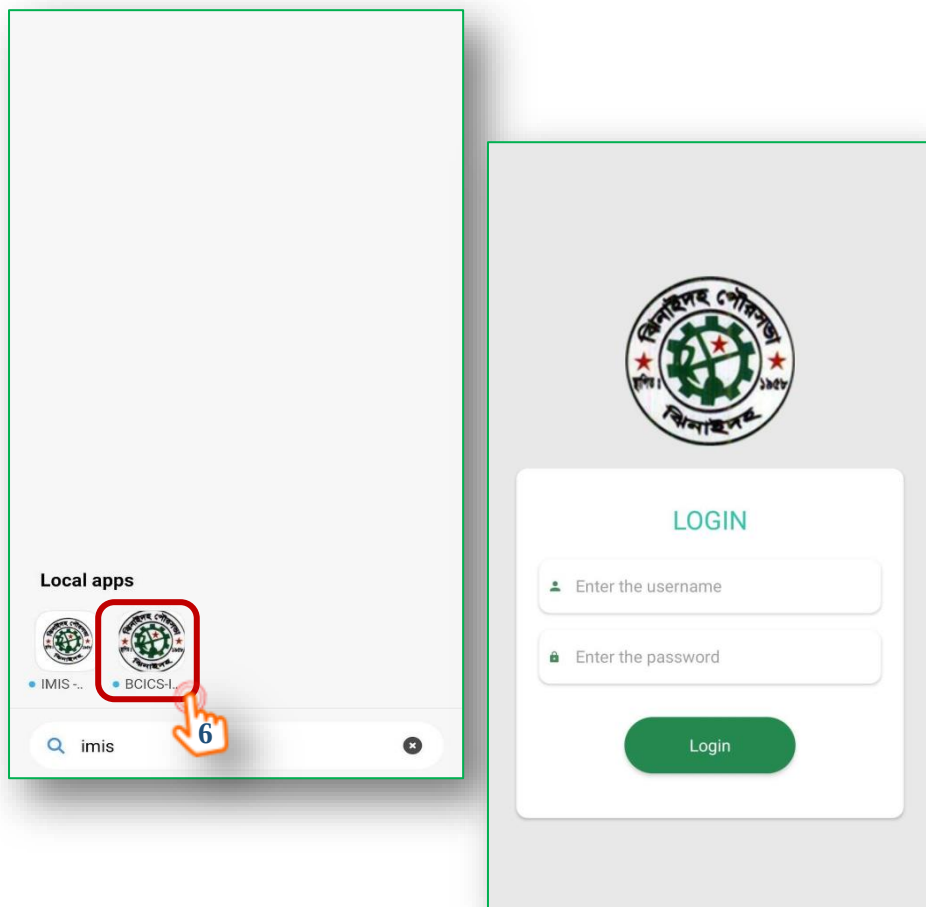

LOGIN

 Enter the username

 Enter the password

Login

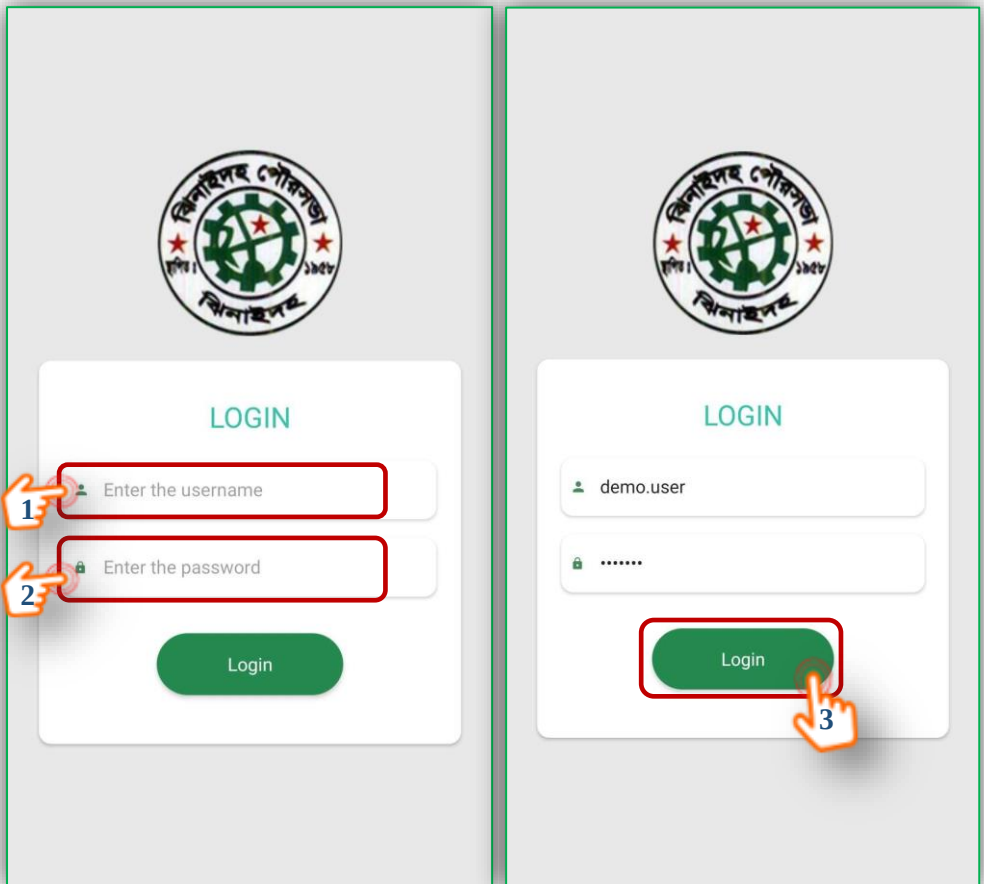

Step 6: The installed app can also be accessed from App drawer or Launcher

3 LOG IN

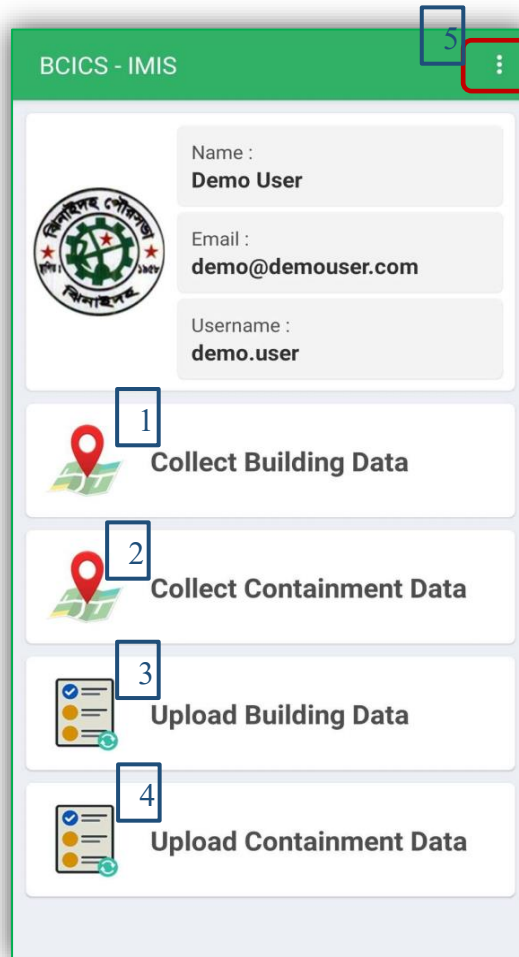

Upon opening the app for the first time, user will see a standard “Log in” screen. Appropriate users of the app are registered through IMIS web portal with a username and password by the Administrator.

1. Enter provided username in ‘Username’ field.
2. Enter provided password in ‘Password’ field.
3. Tap on ‘Login’ button.

4 DASHBOARD

After successful login, a Dashboard screen will appear. User can access five features from here:

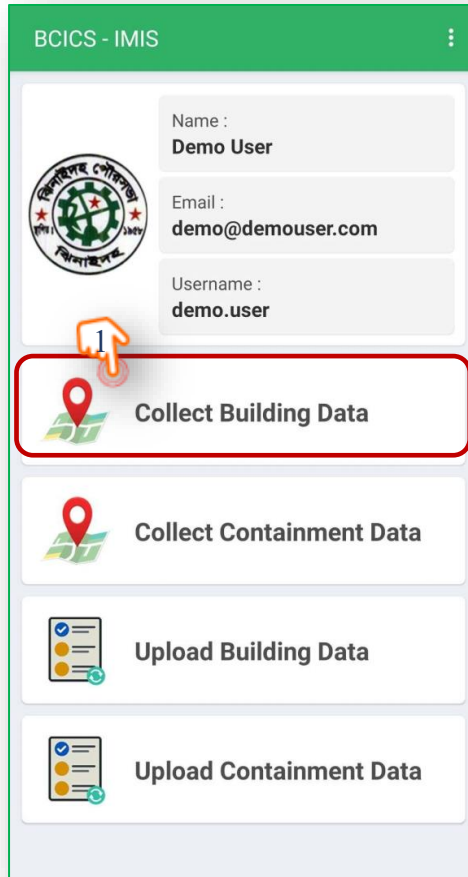

1. **Collect Building Data:** Save building's location, BIN and Tax code.
2. **Collect Containment Data:** Save containment's location and code.
3. **Upload Building Data:** Upload the collected building data to server.
4. **Upload Containment Data:** Upload the collected containment data to server.
5. **Logout:** Available as Option menu in App bar.

5 COLLECT BUILDING DATA

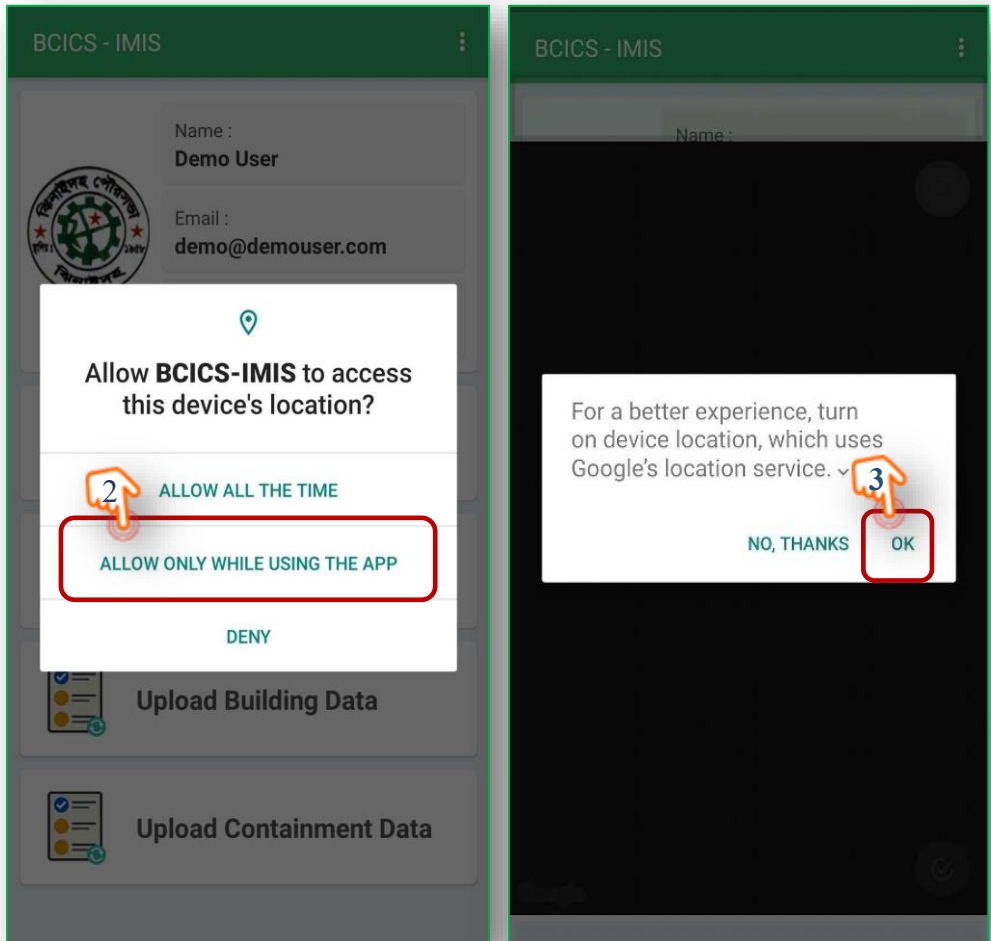

Please follow the steps described below in order to collect building data.

Step 1: Tap on the ‘[Collect Building Data](#)’ button. This will lead user to a map.

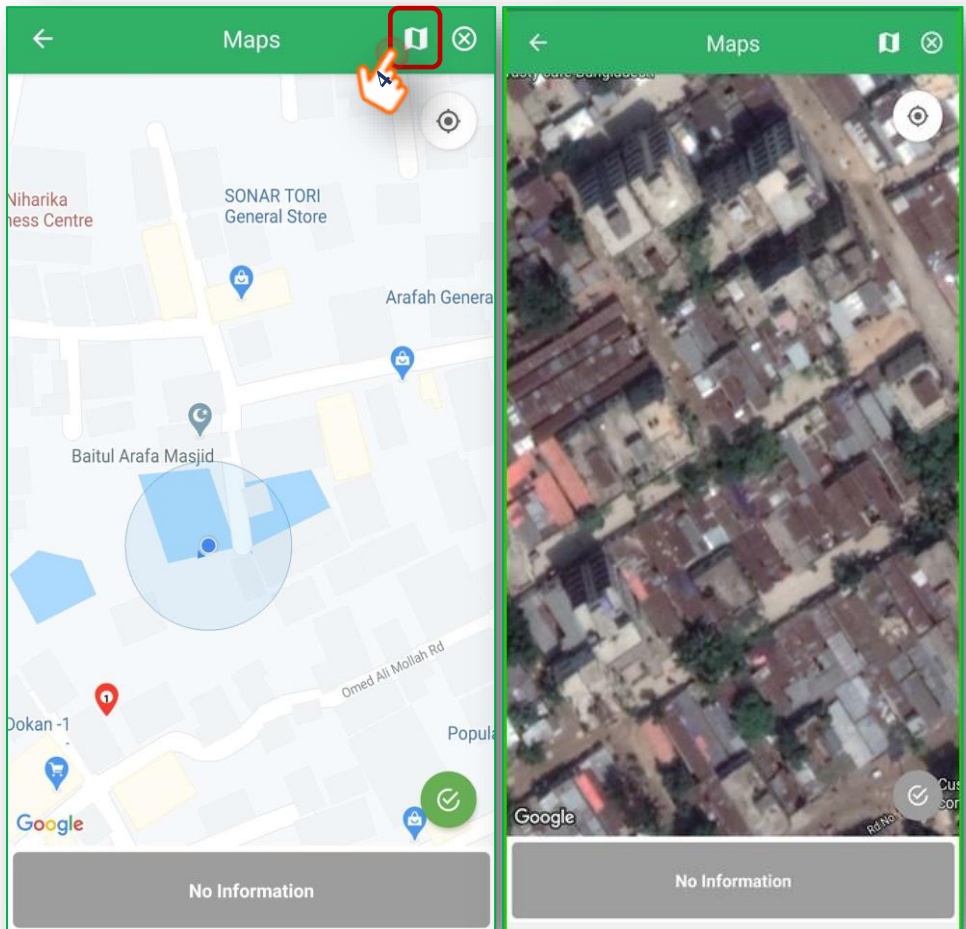

Step 2: Tap ‘**ALLOW ONLY WHILE USING THE APP**’ button to grant permission to access device’s location.

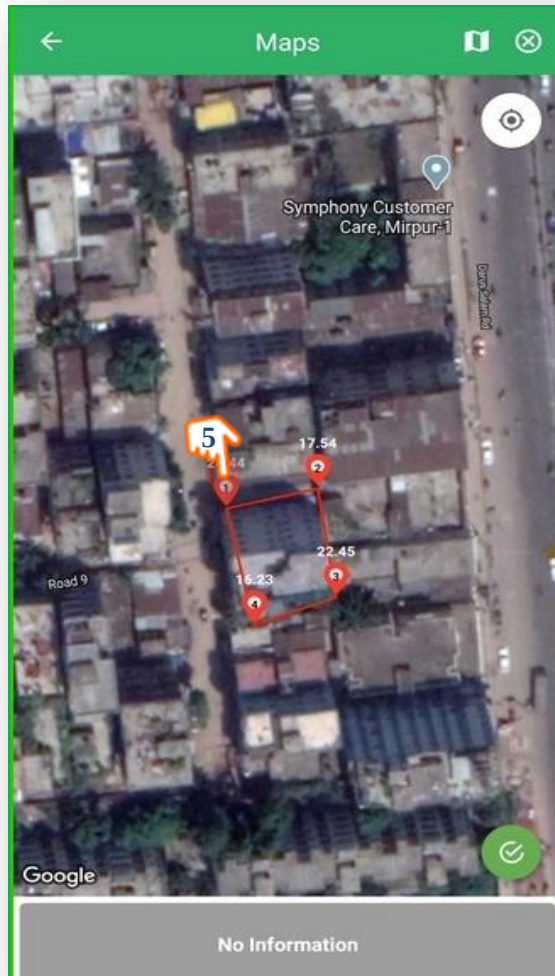

Step 3: Tap ‘**OK**’ button to turn on location and view map.

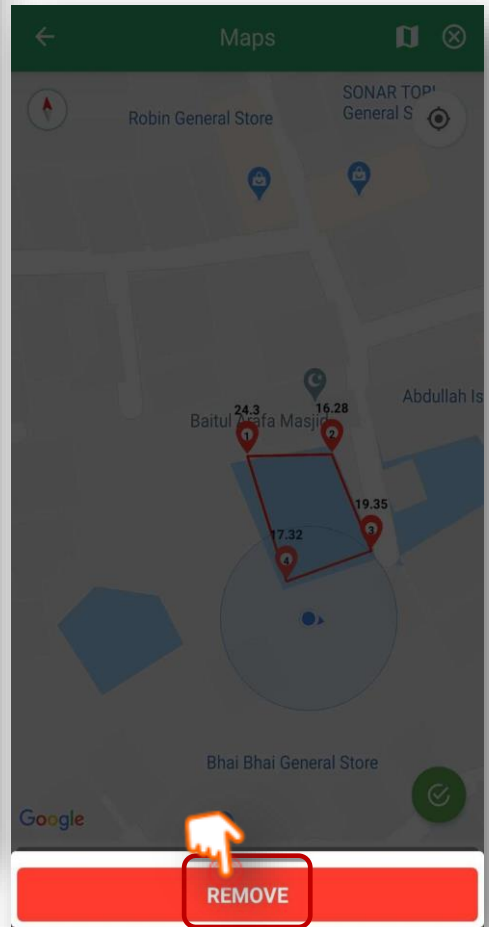

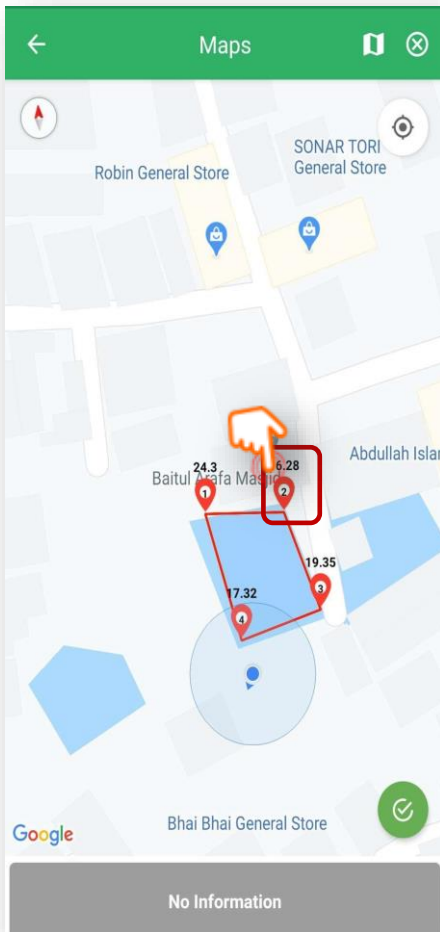

Step 4: Tap the Map sign on the right to change from “default view” to “satellite view”

Step 5: Zoom in/zoom out using fingers and Tap on the corners of the building to put markers on them. Tap on all corners of the building to make a matching shape.

Optional Step: To remove any markers, tap on the marker. A ‘**Remove**’ option will appear below. Tap it and the markers will be deleted. The markers are numbered from 1 and are added in numerical order.

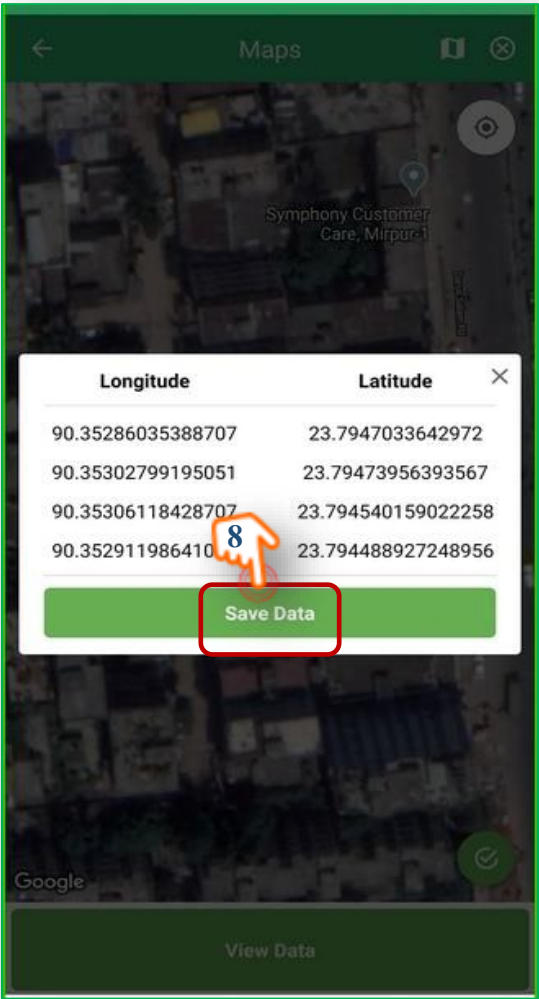

Step 6: If the markers are set accurately, tap on ‘Tick’ button below.

Step 7: Tap on ‘[View Data](#)’ to see all the coordinates.

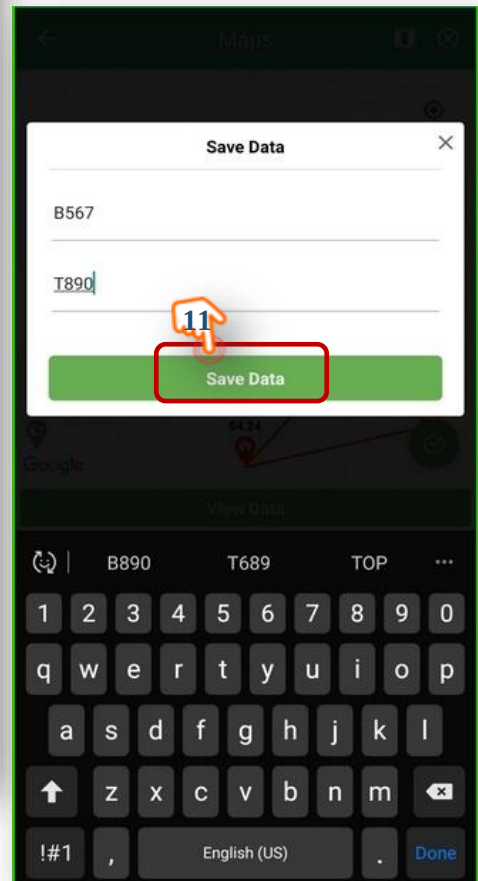

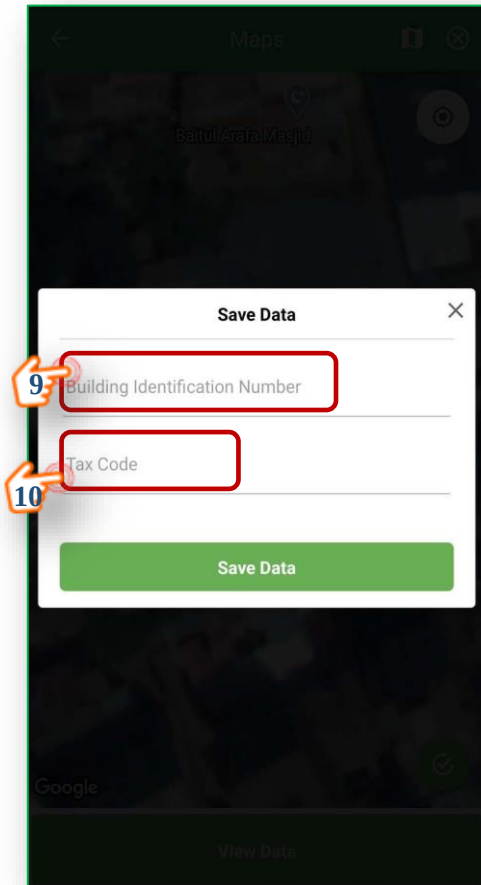

Step 8: Tap on ‘**Save Data**’ button to confirm the coordinates.

Step 9: After confirming the coordinates, an input form will pop-up. Enter ‘**Building Identification Number**’ on first box.

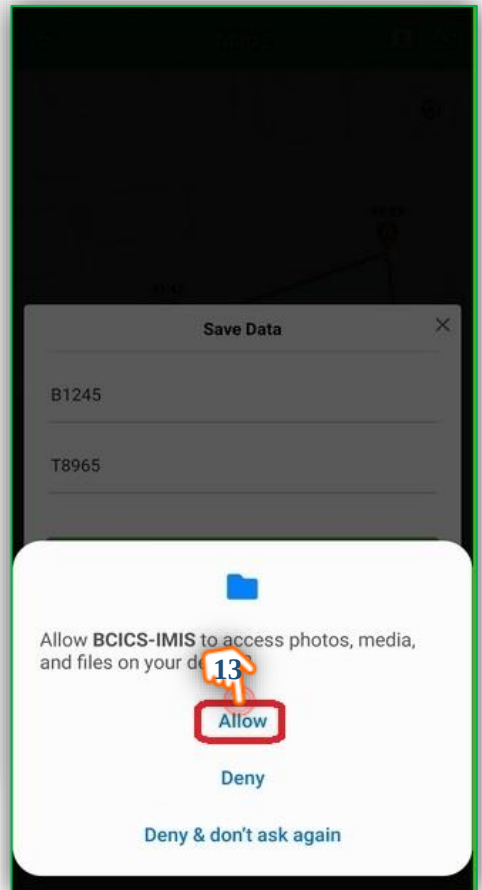

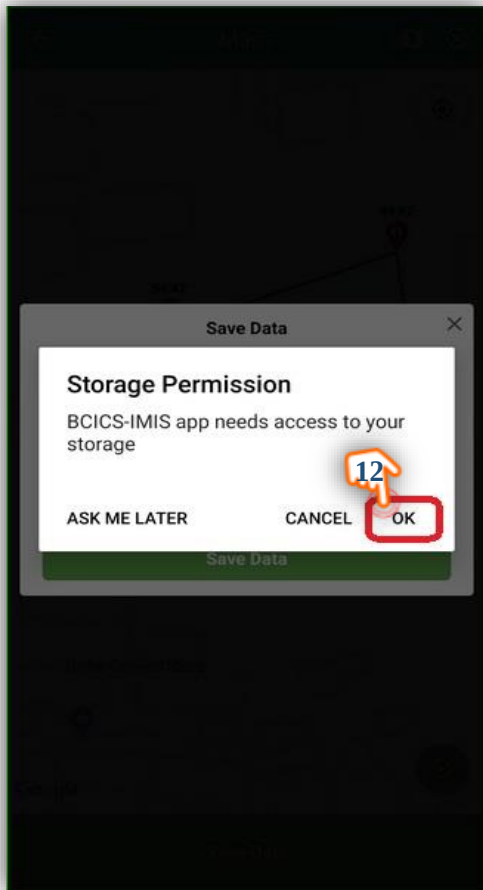

Step 10: Enter ‘**Tax Code**’ on second form.

Step 11: Tap on ‘**Save Data**’ button.

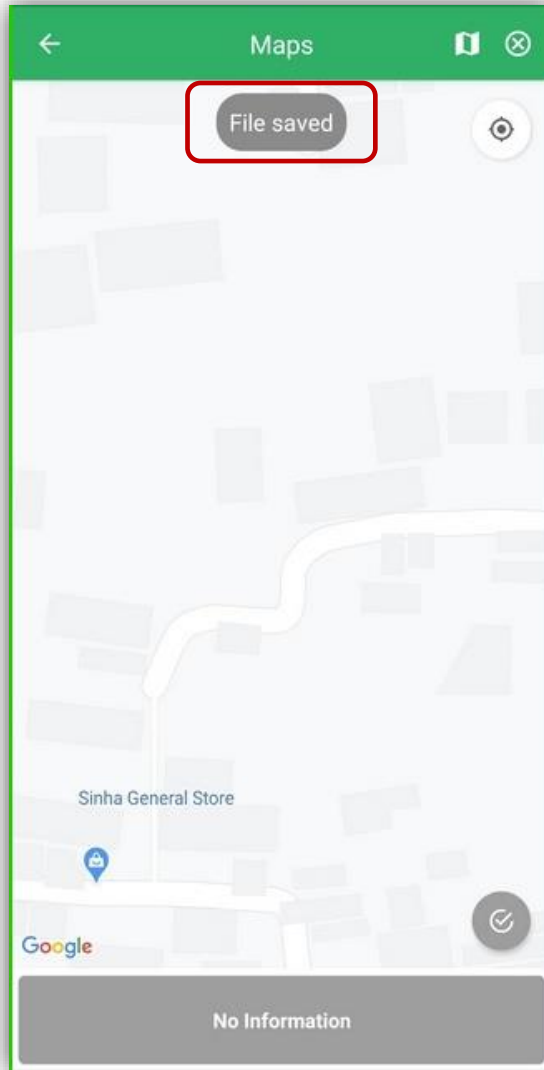

Step 12: Tap ‘OK’ button to grant permission to access device’s storage.

Step 13: Finally, tap on ‘Allow’ button to save the file on storage.

“File Saved” notification will be displayed confirming successful collection of building data.

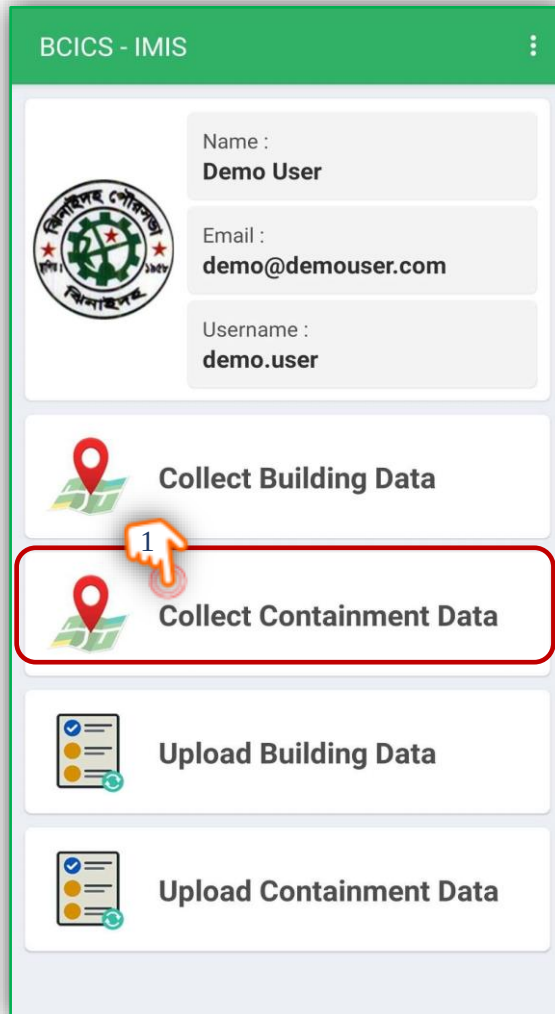

Repeat the above steps to collect more building data.

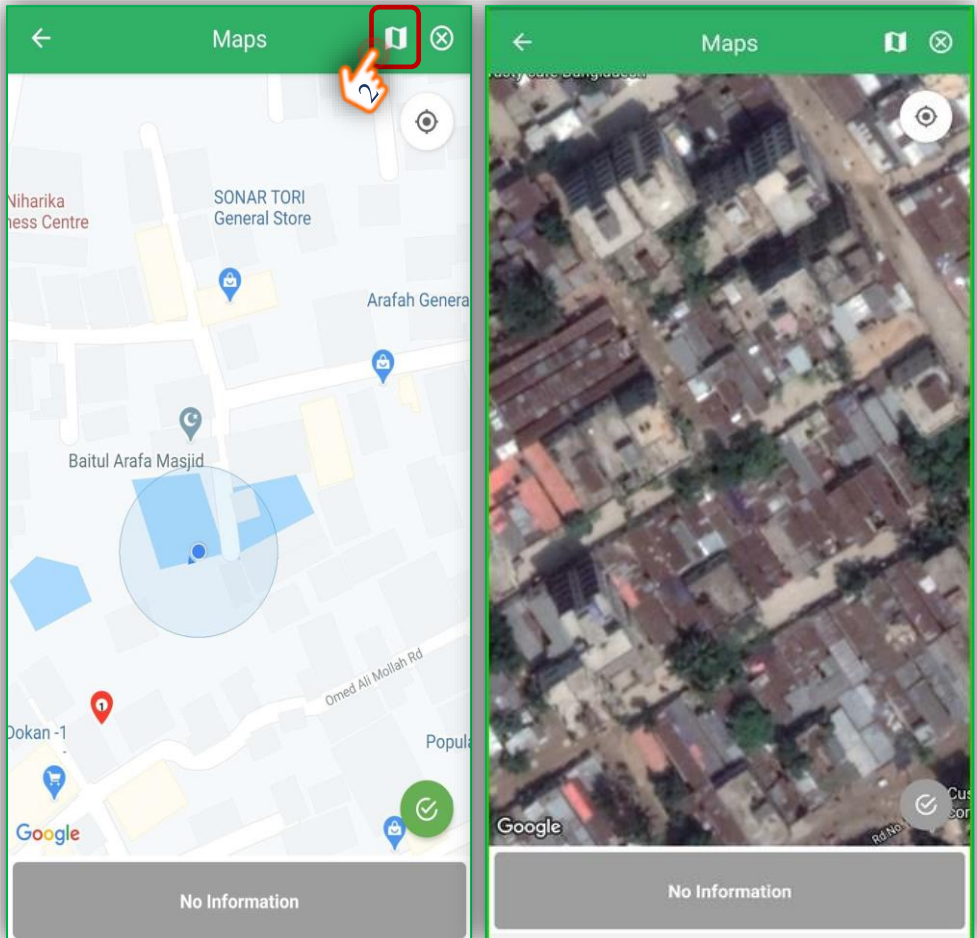

6 COLLECT CONTAINMENT DATA

Please follow the steps described below in order to collect containment data.

Step 1: Tap on the ‘Collect Containment Data’ button. This will lead user to a map view

Step 2: Tap the Map sign on the right to change from “default view” to “satellite view”

Step 3: zoom in/out with fingers and point the desired containment on map.

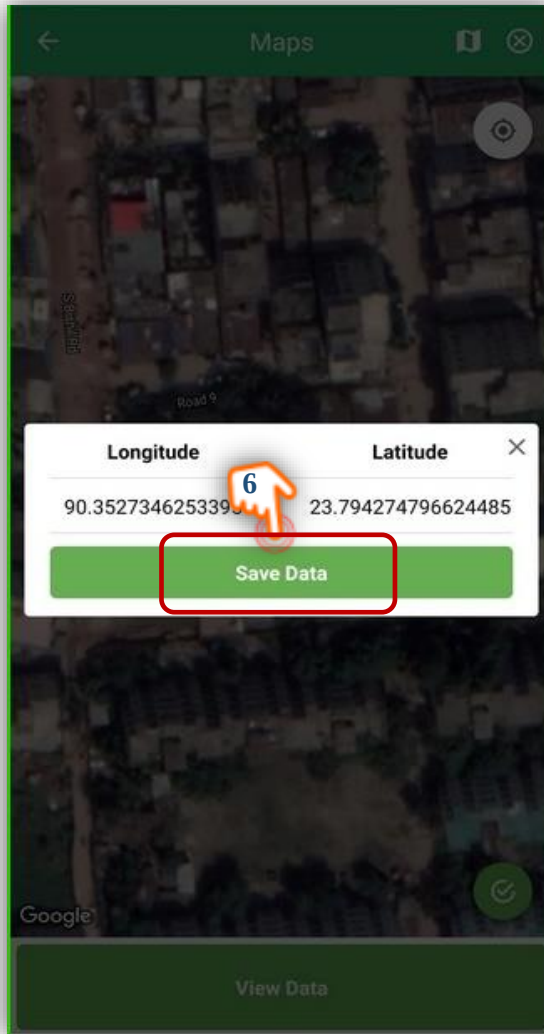

Step 4: If the containment's location is accurate, tap on 'Tick' button below.

Step 5: Tap on ‘[View Data](#)’ to see the coordinate.

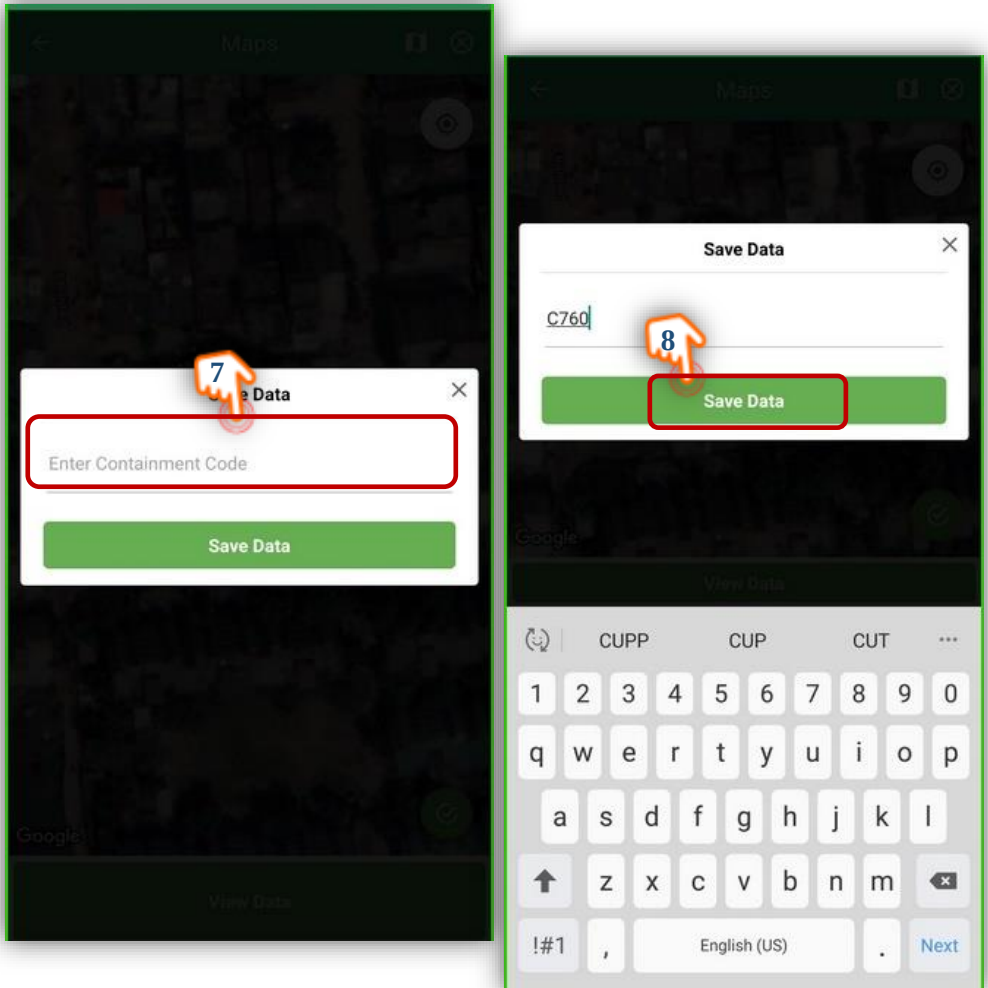

Step 6: Tap on ‘[Save Data](#)’ button to confirm the coordinate.

Step 7: An input box will be displayed. Insert value on ‘**Enter Containment Code**’ text box.

Step 8: Finally, tap on ‘**Save Data**’ button to store the data and finish containment collection process.

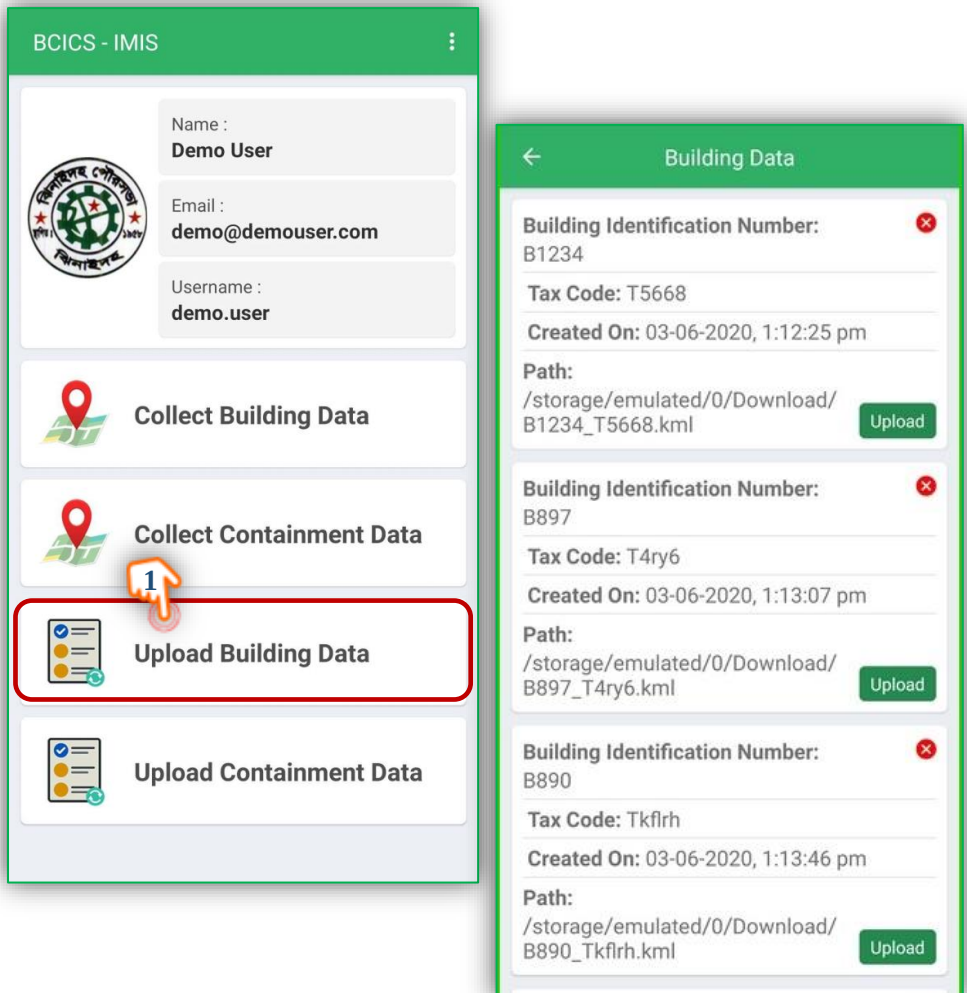

Repeat the above steps to collect more containment data.

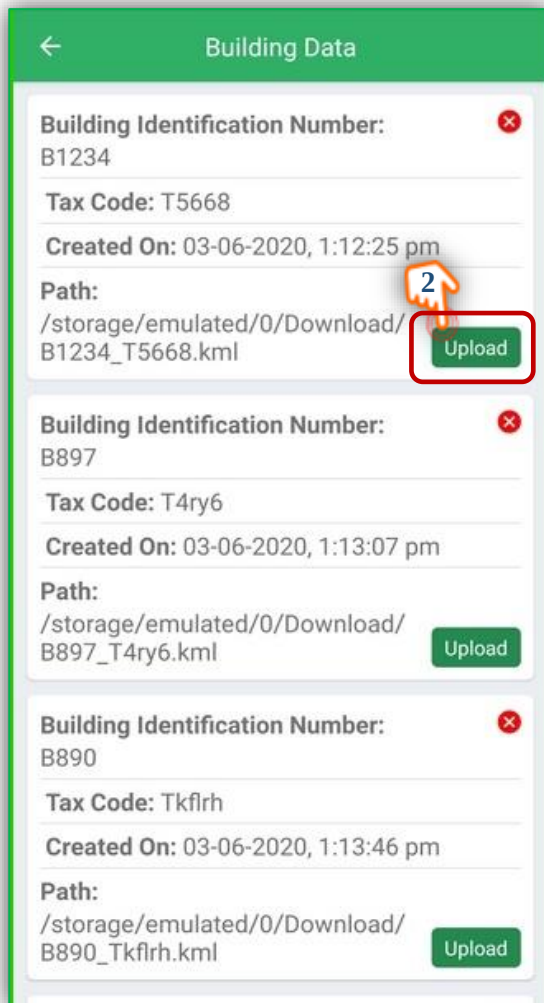

7 UPLOAD BUILDING DATA

Please follow the steps described below in order to upload previously collected building data.

Step 1: Tap on the ‘**Upload Building Data**’ button. A list of all collected building data will be displayed in card view

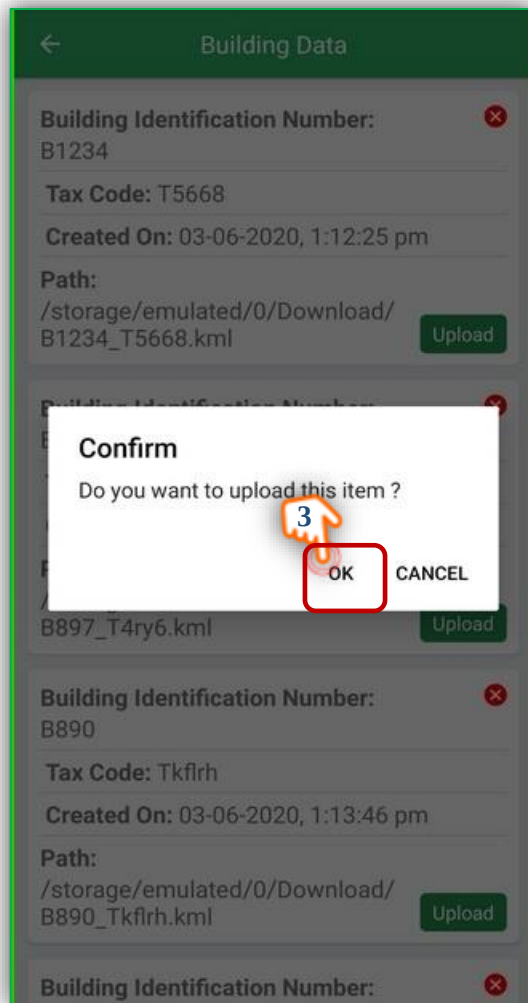

Step 2: Tap ‘Upload’ button on a building data.

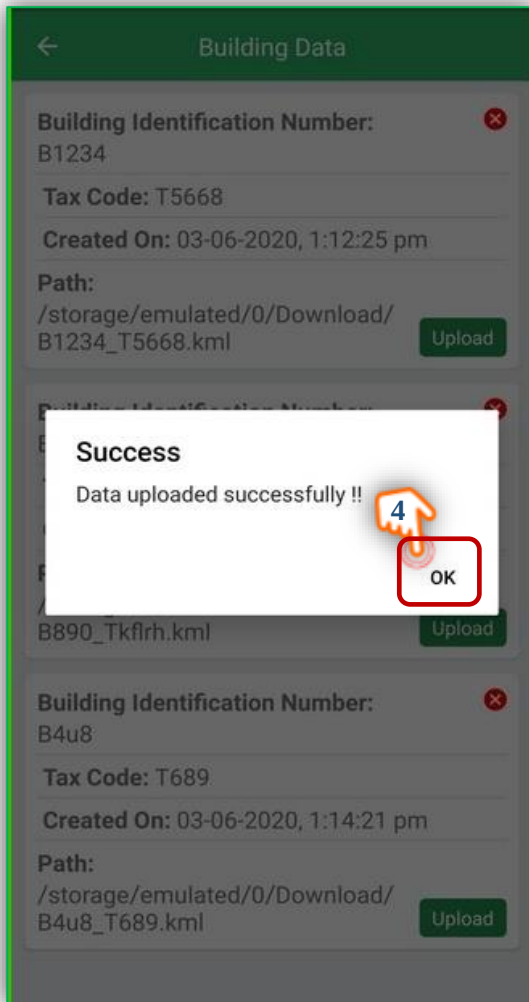

The screenshot shows the 'Building Data' screen in the BCICS App. It displays a list of three building entries. The first entry is highlighted with a red box around the 'Upload' button, and an orange arrow points to it with a '2' in a red circle, indicating the step number. The second and third entries also have 'Upload' buttons.

Building Identification Number	Tax Code	Created On	Path	Action
B1234	T5668	03-06-2020, 1:12:25 pm	/storage/emulated/0/Download/B1234_T5668.kml	Upload
B897	T4ry6	03-06-2020, 1:13:07 pm	/storage/emulated/0/Download/B897_T4ry6.kml	Upload
B890	Tkflrh	03-06-2020, 1:13:46 pm	/storage/emulated/0/Download/B890_Tkflrh.kml	Upload

Step 3: A confirmation dialog will pop-up. Tap the ‘OK’ button.

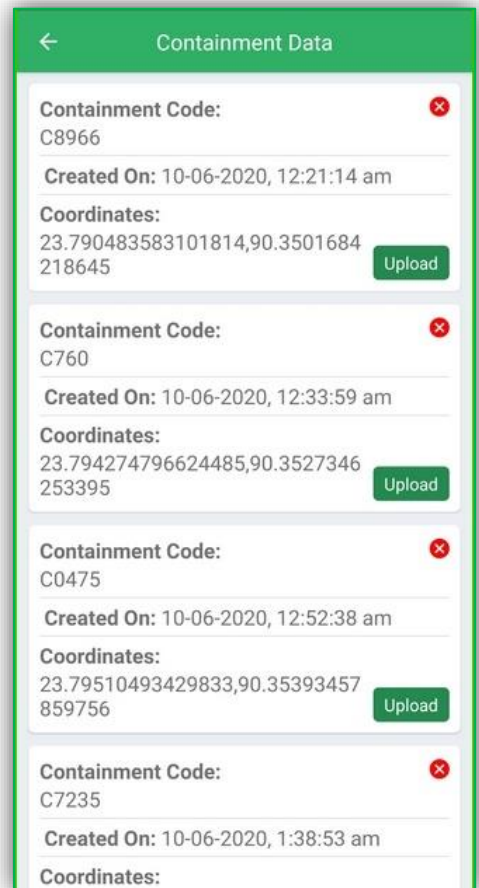

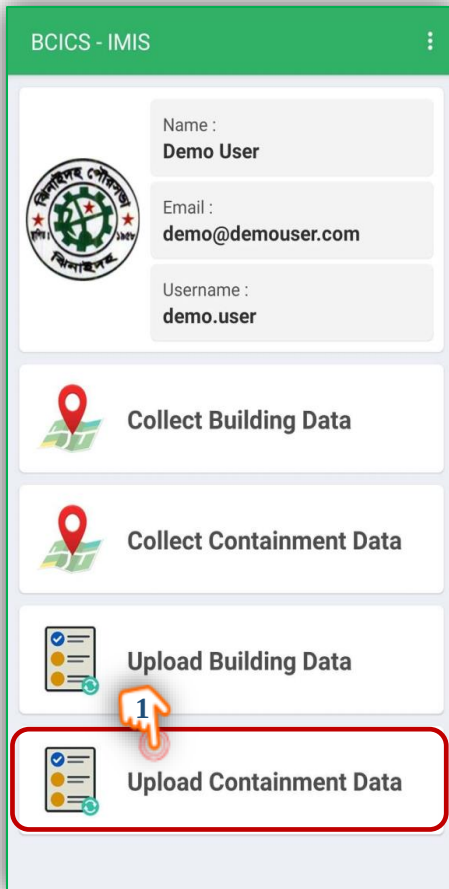

Step 4: A Success confirmation dialog will pop-up. Tap the ‘OK’ button. With the completion of this step, collected building data will be successfully uploaded to server.

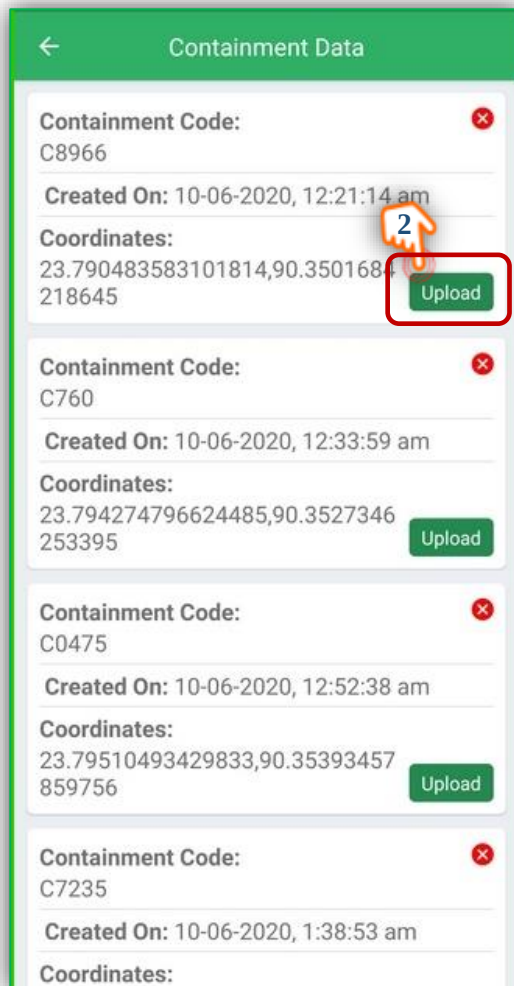

8 UPLOAD CONTAINMENT DATA

Please follow the steps described below in order to upload previously collected containment data.

Step 1: Tap on the ‘**Upload Containment Data**’ button. A list of all collected containment data will be displayed in card view.

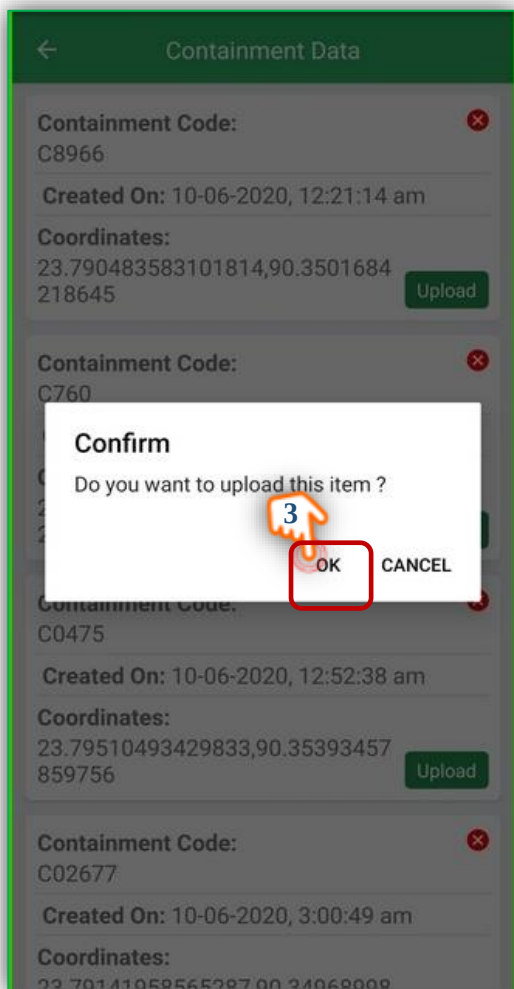

Step 2: Tap ‘Upload’ button on a containment data.

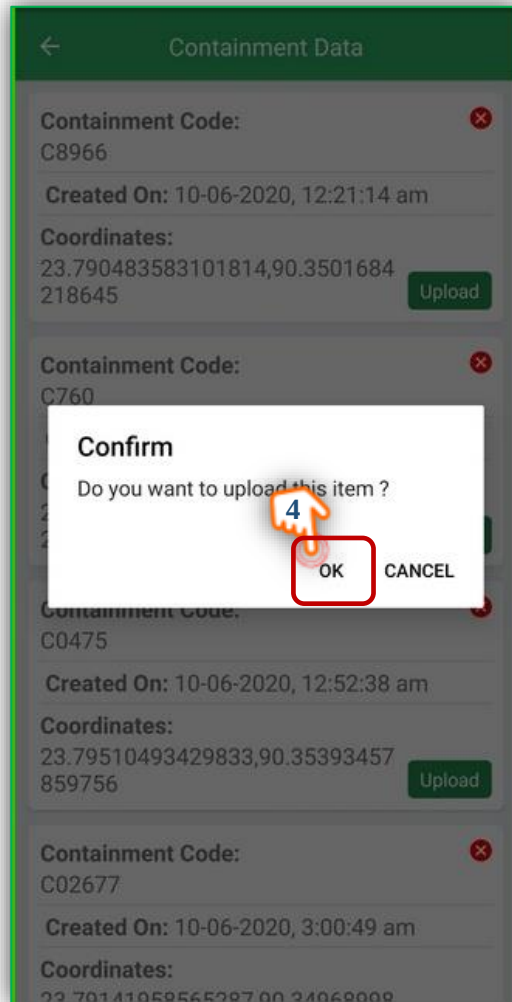

The screenshot shows the 'Containment Data' screen in the BCICS App. It features a green header with a back arrow and the title 'Containment Data'. Below the header, there are four entries, each with a 'Containment Code', 'Created On' date and time, and 'Coordinates'. The first entry is highlighted with a red box around the 'Upload' button, and a hand icon with the number '2' points to it, indicating the step to tap the 'Upload' button.

Containment Code	Created On	Coordinates	Action
C8966	10-06-2020, 12:21:14 am	23.790483583101814,90.350168 218645	Upload
C760	10-06-2020, 12:33:59 am	23.794274796624485,90.3527346 253395	Upload
C0475	10-06-2020, 12:52:38 am	23.79510493429833,90.35393457 859756	Upload
C7235	10-06-2020, 1:38:53 am		

Step 3: A confirmation dialog will pop-up. Tap the ‘OK’ button.

Step 4: A Success confirmation dialog will pop-up. Tap the ‘OK’ button. With the completion of this step, collected containment data will be successfully uploaded to server.

IMIS FRAMEWORK

IMIS stands for **Integrated GIS-based Municipal Information System** developed for managing faecal sludge in Khulna City Corporation
